

In June, the Georgia Poison Center handled 10,006 calls, of which 7,543 calls were related to human exposures, 740 calls related to animal exposures and 1,723 calls were related to general poison information.

The specialized staff at the Georgia Poison Center was able to effectively triage 70% of calls that were received from the general public at the site of exposure without referral to a health care facility by providing simple first aid instructions over the phone.

About 49% of calls received involved children under the age of 5 years.

The Georgia Poison Center provides vital poisoning information as well as toxicology consultations to healthcare professionals. This month, the GPC, received 1,229 calls from health care professionals, making up about 19% of the calls received involving poison exposures.
