

Pregnant Women & Nursing Mothers

If you are pregnant, medicine can pass from you to your unborn baby. If you are breast feeding, medicine can also pass into breast milk. If you are pregnant or breast feeding, talk to your doctor, pharmacist, or the Georgia Poison Center before taking any medicine.

Iron Poisoning

Iron is a mineral needed for good health. Too much iron can be unsafe—even deadly! Keep vitamins and other products with iron out of the reach and sight of children. Always keep them in a locked cabinet.

7 DAYS A WEEK:
1-800-222-1222
Teletype for the
deaf and hearing
Impaired only:
TDD 404-616-9287**

Medicine Safety

Medicine can help you when you are sick or hurt. Medicines can even save your life. Prescription and over-the-counter medicines can be poisonous if you take too much or use them the wrong way.

Medicine Safety

Help keep your family safe by following the safety tips below. Use the Medicine Safety Checklist to make sure you give and take medicines safely!

1. Store Medicine Safely

- Keep medicines and vitamins in bottles with child-safety caps. Remember, child-safety caps are not child proof! Make sure the safety caps are on tight at all times.
- Store medicine and vitamins in locked cabinets out of the reach and sight of children.
- After each use, place the safety cap back onto the bottle tightly, and return the bottle to a locked cabinet.
- Do not flush expired or leftover medicines down the toilet. Call the Georgia Poison Center (GPC) at 1-800-222-1222 to get the correct disposal information. You can also email or chat with us by visiting our website at www.georgiapoisoncenter.org.

2. Use Medicines Safely

- Follow your doctor or pharmacist's instructions. Always take the right amount of medicine at the right time. If you have any questions, call your doctor, pharmacist or the GPC.
- Always read the label-check for your name, name of medicine, amount to take, and how often to take.
- Taking medicine with some foods, alcohol, or other medicines can be harmful. Talk to your doctor or pharmacists.
- Only take medicine that belongs to you. Do no share your medicine with anyone else.
- Do not take or give medicine in the dark, or while you are sleepy. If you wear glasses, always put them on first.

3. Know What to do in a Poison Emergency

- Keep the phone number of the GPC on or near your phones.
- If you think someone has been poisoned, call the GPC right away! Do not wait for the victim to look or feel sick!

Children and Medicine

- When you give liquid medicine to your child, use a medicine spoon, dropper or syringe. Do not use kitchen spoons.
- Before you give your child medicine, read the label and follow. If you have any questions, call your doctor, pharmacist or the GPC.
- Always check the label for the correct dosage for your child's age.
- Know the difference between dosing amounts. For example, a tablespoon (tbsp.) is not the same as a teaspoon (tsp.).
- Never call medicine candy! Your child may take a medicine, thinking it is candy.
- Never give your child someone else's medicine.
- If your child throws up or spills some medicine, do not give your child extra medicine. This could cause an overdose. Instead, call your doctor, pharmacist, or the GPC.

Medicine Safety Checklist

1. Name of medicine? _____
2. Who is the medicine for? _____
3. Taking for what? _____
4. Amount to take or give? _____
5. Take how? _____
Take when? _____
6. Take for how long? _____
7. Foods to avoid? _____
8. Drinks to avoid? _____
9. Other medicine to avoid? _____
10. Activities to avoid? _____
11. Other things to avoid? _____
12. Are there any side effects and what to do? _____
13. Other information about the medicine? _____
14. Doctors Name: _____
15. Doctors Phone #: _____

Certified as a Regional Poison Center by the American Association of Poison Control Centers.

The Georgia Poison Center

Each year, the Georgia Poison Center provides services to thousands of people in Georgia. You can call the GPC to get help in a poisoning emergency or to get treatment advice about animal or insect bites. Nurses, pharmacists, and doctors answer the phones 24 hours per day, 7 days per week. They can tell you what to do if you, your child, or your pet is poisoned or was bitten by an animal. In addition, the GPC staff can answer your questions about poisons in and around your home.

All calls to the GPC are free.

To order educational material, call the Education Department at 404.616.9235 or visit our website at www.georgiapoisoncenter.org
