

Georgia Poison Center

# Preventing Poisonings in the Home

A poison is anything that can make you sick, hurt you, or even kill you if it gets into your body through your mouth, nose, eyes, or skin. Poisons found in and around the home include: cleaning products, laundry products, garden and lawn care products, auto fluids and cosmetics. These poisons often come in bright colors and pretty bottles. Children may mistake poisons for something good to eat or drink. Medicines and vitamins can also be a poison. Both prescription and over-the-counter medicines can be a poison if you take too much or use them the wrong way. Plants can also be a poison. Both indoor and outdoor plants can be harmful if they are used in the wrong way.

## First Aid

In case of a poisoning, follow these first-aid steps:

For Swallowed Poisons:

- Call the GPC right away.

For Poisons in the Eye:

- Flush the victim's eye with lukewarm water for about 20 minutes.
- Call the GPC

For Inhaled (Breathed In) Poisons:

- Get the victim to fresh air right away.

• Call the GPC.

For Poisons on the Skin:

- Take off any clothing that has poison on it.
- Rinse the victim's skin with water for 20 minutes.
- Call the GPC

**IN A POISONING  
EMERGENCY, CALL  
24-HOURS A DAY,  
7 DAYS A WEEK:**

1-800-222-1222

Teletype for the  
deaf and hearing  
Impaired only:

TDD 404-616-9287

## Poison Safety

Here are some safety tips to help keep your family safe from poisons. Use the Home Safety Checklist (on the back) to help you store the listed poisons safely!

### 1. Store Poison Safely

- Store poisons in locked cabinets out of reach and sight of children and pets.
- Keep poisons stored in the bottles they came in. Make sure the bottles are clearly labeled.

### 2. Use Poisons Safely

- Before you use a poison, read the label on the bottle.
- While you are using a poison, never leave it out where a child may get to it.
- After you use a poison, put it back in a locked cabinet. Make sure the bottle is closed tightly.

### 3. Know What to do in a Poisoning Emergency

- Keep the phone number of the Georgia Poison Center (GPC) on or near your phones.
- If you think someone has been poisoned, call the GPC right away at 1-800-222-1222. You can also email or chat with us by visiting our website at [www.georgiapoisontcenter.org](http://www.georgiapoisontcenter.org). Never wait for the person to look or feel sick!

**Child Safety Caps are not child proof! Some children can open these caps. This is why it is important to keep medicines and vitamins locked up!**

## Calling the Georgia Poison Center...

When you call the GPC, take the poison with you to the phone. You may be asked to read the label on the container. You will be asked to give:

- Your name, phone number, county, and zip code
- The victim's name, age and weight
- Any symptoms the victim has
- The time the poisoning took place
- The name of the substance or poison
- The amount of the substance or poison
- Any current health problems the victim has
- Any medicines the victim is taking

## Syrup of Ipecac

Syrup of Ipecac is a plant extract used to make a person throw up. At this time, the GPC recommends that Syrup of Ipecac should no longer be used in the home as a poison treatment. For questions or concerns, call the poison center at 1-800-222-1222.

## Home Safety Checklist

Use this checklist to make sure the poisons listed are stored in locked cabinets, out of the reach and sight of children and pets. Call the Poison Center right away if you think someone has been poisoned by any of the poisons listed.

\*The poisons marked with an asterisk (\*) can be very dangerous. Be very careful when suing and storing these poisons.

For a listing of poisonous plants, call the GPC Education Department at 404.616.9235.

## The Georgia Poison Center

Each year, the Georgia Poison Center provides services to thousands of people in Georgia. You can call the GPC to get help in a poisoning emergency or to get treatment advice about animal or insect bites. Nurses, pharmacists, and doctors answer the phones 24 hours per day, 7 days per week. They can tell you what to do if you, your child, or your pet is poisoned or was bitten by an animal. In addition, the GPC staff can answer your questions about poisons in and around your home.

All calls to the GPC are free.

To order educational material, call the Education Department at 404.616.9235 or visit our website at [www.georgiapoisoncenter.org](http://www.georgiapoisoncenter.org)
